Subject: FW: Salient for Blades, DE for next week

Update on Blades PFAS contamination, Blades, Delaware – EPA continues to coordinate and conduct sampling of residential wells in the vicinity of the PFAS-contaminated groundwater that has effected the water supply for the Town of Blades. Thus far, 55 residents have requested sampling. EPA is also initiating re-sampling of homes for which the State of Delaware has provided carbon filter units. Additionally, EPA is initiating a Site Inspection (SI) assessment surrounding two facilities and the residential areas impacted by the per- and polyfluoroalkyl substances (PFASs) as well as electroplating fluids.
